**Subject:** RE: Barge unloading schedule

I agree we should ask for all of it from March 1 to present and have them submit that same information moving forward.

**Subject:** RE: Barge unloading schedule

Looks good to me, I agree that asking for a block of time is better than individual days. You could ask for only days when an FRM filter was collected, but we would be unable to determine any correlations to the FEM readings then.

**Subject:** Barge unloading schedule

I don't really want to ask for certain days – I think we need them all. How this:

EPA requests all the barge unloading schedules from the time period March 1, 2017 through August 31, 2017. If SH. Bell prefers, June – August can be submitted first, with March – May in a second submission. Specifically, EPA would like to see a schedule of *how much* and *what* material was unloaded from a barge, and *where* that barge was specifically unloaded (dock location). If not clear on the records, please note how the material was received (bulk, super sack, etc.).
